

RCM SOLUTIONS FOR PATHOLOGY & CLINICAL LABS

In the time-critical world of pathology, preauthorization delays and sloppy A/R are simply unacceptable. Juggling a daily myriad of tests has never been easy, but as compliance regulations climb and revenue margins shrink in, the new realities of value-based care, labs of all sizes are scrambling for innovative revenue management solutions.

Infinx tackles the day-to-day administrative hurdles of pathology:

Insurance verification and preauthorization

ICD-10 coding

Frequent quality auditing

Accounts Receivable Management

Pathology billing

Denial management

- We specialize in resolving aged accounts (120 days or longer) to enhance your net collection rate at the lowest possible costs.
- Infinx already delivers improved >99.5% coding accuracy for one of the largest pathology groups in the U.S.

Too often, pathology bottlenecks start at the very beginning, when labs are forced to spend valuable time waiting for stringent insurance verification or preauthorization before crucial diagnostic tests can begin.

Infinx comes to the rescue with iBridge, our centralized pre-registration workflow management software. Via an intuitive dashboard interface, iBridge tracks real-time status of every patient - from registration through insurance verification and preauthorization directly to clinical diagnostics.

iBridge offers pathology labs streamlined RCM, delivering exceptional 99.5 percent accuracy – leading to nearly 100 percent payor approvals.

RELIABLE, ERROR-FREE CODING

The convenience of iBridge is backed by our handpicked team of over 400 AAPC-certified ICD-10 coding specialists - extensively trained and continually updated in advanced CPT codes and clinical descriptors, along with the latest regulatory changes. Infix pathology coders ensure virtually error-free coding, regularly double-checked by our internal auditors to significantly reduce payor denials.

Infix dramatically improves coding efficiency:

Reliable 99+ percent data accuracy with turnarounds under 24 hours

Vast experience on multiple computer-assisted coding (CAC) engines and billing platforms

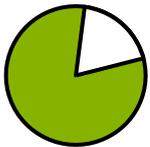

Internal auditors regularly double-check outgoing claims to ensure timely approvals and minimize denials

STREAMLINED BILLING AND A/R RESOLUTION

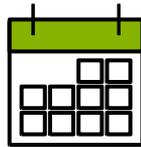

For pathology labs in particular, juggling increasing patient volumes while keeping up with the latest technology is a tough job, and too many in-house staff members simply become overwhelmed - until precious dollars begin falling through the cracks.

Infix A/R specialists are extensively trained on all major payment management system (PMS) platforms to improve your overall net collections. We'll also review chronic payor denials to identify and alleviate common pitfalls affecting claims.

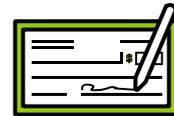

Let us help you collect more with:

A/R cleanup & Resolution

Open account resolution (accounts aged 40 days or more)

Timely follow-up / analysis of all payor transactions

Credit Balance Resolution

Denial management and analytics

Ongoing A/R process refinement

Pathology shouldn't include diagnosing your own A/R headaches.
