KEY FEATURES

- **Insurance Verification & Benefits Check:** Automated real-time eligibility checks and benefit information, available through an HL7 integration
- **Provider & Payer Integration:** Submit and update your prior authorization claims directly from your EHR/EMR system using a HL7 or API based bi-directional integration. Integrates with many payers and clearinghouses
- **Reporting & Analytics:** Obtain full transparency into your prior authorization workflow using real-time analytics and status reporting to track every claim
- **Large CPT Database:** Fast approvals on large volume of CPT codes requiring prior authorizations
- **Alerts & Notifications:** Status notifications are communicated real-time through automated follow-up. Cases with a high risk of denial due to lack of medical necessity or if clinicals are required, are automatically flagged and our team and will follow-up with a benefit manager, if required
- **Automated Authorization Follow-up:** Our robotic process automation bots repeatedly checks requests that are under review for updates regarding status change
- **Certified Specialists:** 300+ team of certified prior authorization and billing specialists to handle manual submissions, complex claims and changing payer guidelines
- **Quick STAT:** Prior authorizations for routine care are initiated within 24 hours, and high-priority STAT cases are initiated within 30 minutes

BENEFITS TO YOUR ORGANIZATION
